ABOUT ME

Currently, I am technologist in Industry Automation with knowledge in PLC and programming languages. Logics are my interest that's why I started my second graduation in software engineering because I want to know new technologies, solve problems, create applications and put them into practice with all my dedication to contribute to my company.

SKILLS AND PROFICIENCY

- Programming PLC Siemens;
- Maintenance of eletronics;
- Python / HTML / CSS / SQL;
- Communication and dialog.

COURSES AND VOLUNTEER WORK

- Basic and Advanced PLC Tia Portal
SENAI - SBC/SP
- Python
FIAP
- Advanced English
Yes! - SBC/SP
- Arduino
FATEC - SBC/SP
- Python Programming Language
Fundação Bradesco
- Mobile Games Development
Universidade Cruzeiro do Sul
- Technical Support Analyst
MicroPRO - SBC/SP

CAREER

Junior Automatist

Selettra Automação e Robótica

Feb. of 2024 - Present

- Project monitoring aiming at possible software changes;
- Network and Scanner Configuration;
- Industrial machine integrations;
- Implement improvements to the project software;

Junior Industrial Assembler

Apr. of 2023 - Feb. of 2024

- Maintenance of AGV's following customer requests
- Perform assembly and disassembly of pneumatic, components and adjustment of parts according to design.
- Assembly and disassembly of machines and equipment in general, also low voltage panels.
- Project monitoring searching possible software changes or grow ups.

Calibration Technician I

Balitek Instrumentos e Serviços

Feb. of 2022 - Mar. of 2023

- Work in laboratories performing the calibration of metrological instruments of the most diverse types.
- Assisted in the expedition in appropriate times.

Mechatronics Intern

Dalcon do Brasil

Sep. of 2021 - Feb. of 2022

- Assistance in the production of valves and sanitary connections.
- Handling industrial lathes and drills.

Technical Assistant Intern

Micrologic

Feb. of 2021 - Aug. of 2021

- Maintenance of eletronics, computers and cell phones
- Customer service.

EDUCATION

Universidade Cruzeiro do Sul
Bachelor Degree Software Engineer
2023 - 2027

Faculdade de Tecnologia 'Adib Moisés Dib'
Technology Industrial Automation
2020 - 2022

Gustavo Silva Almeida

Hello, this is my cover letter.

Despite being young, I have been gaining experiences in the job market that I could never have imagined, from fixing electronics to participating in projects with high technological demand. Undoubtedly, I am in the right field.

Since I entered the field of automation, my desire for programming has been growing more and more, and it doesn't stop there. Since I had my first contact with scripts and codes, I could see that I have excellent logical development, which facilitates the execution of any project.

Furthermore, I have been acquiring certifications and expanding my portfolio to showcase small software projects that have contributed to my development. After all, I know that down the line, I will look back at these applications and be grateful for each lesson.

Learning a new language has always been something that I considered obligatory. That's why I am finishing my English and having more contact with foreigners for practice, allowing it to flow naturally. I can't wait to learn a new one.

Finally, I want to emphasize that during my 18 years, I had to serve in the army at the São Bernardo do Campo Shooting Range (TG 02-078), going through experiences that will never be forgotten and have contributed to my personal development.

Having said that, I would like to point out that in addition to my professional experience, I also possess qualities as a person. Communication, dialogue, persistence, and dedication are all part of my personality as a whole. Because of this, wherever I go, I give for everyone my respect, and when I leave, I make sure to leave my mark of excellent work, a sense of duty fulfilled.

Sincerely,

Gustavo Silva Almeida
